

# BSMA Meta-Analysis: Full Universe Variables Master Table

100% Verbatim Construct Scoping across 388 Included Studies (k=226 down to k=1)

|                                                   |                                                           |
|---------------------------------------------------|-----------------------------------------------------------|
| <b>Date:</b> July 3, 2026                         | <b>Author:</b> Antigravity (AI Orchestrator)              |
| <b>Scope:</b> 388 Included Papers (`1 = Include`) | <b>Total Harvested Constructs:</b> 1650 unique constructs |

This master document catalogs the complete, unpruned universe of **1,658 unique construct names** extracted verbatim from the hypotheses, research models, and correlation tables of all 388 included candidate studies in the Boundary Spanning Meta-Analysis (BSMA). Constructs are ordered by study frequency (**k**) from highest to lowest across three analytical strata: **Core Hub** ( $k \geq 30$ ), **Middle-Tier** ( $k = 5\sim29$ ), and **Micro Niche** ( $k = 1\sim4$ ).

| Rank | Construct Name (Normalized) | Paper Count (k) | Stratum                     | Sample Verbatim Expressions in Papers                    |
|------|-----------------------------|-----------------|-----------------------------|----------------------------------------------------------|
| 1    | innovation                  | 226             | Core Hub ( $k\geq30$ )      | innovation                                               |
| 2    | creativity                  | 88              | Core Hub ( $k\geq30$ )      | creativity, employee creativity, individual creativity   |
| 3    | job satisfaction            | 75              | Core Hub ( $k\geq30$ )      | job satisfaction                                         |
| 4    | knowledge sharing           | 70              | Core Hub ( $k\geq30$ )      | knowledge sharing                                        |
| 5    | knowledge transfer          | 59              | Core Hub ( $k\geq30$ )      | knowledge transfer                                       |
| 6    | social network              | 55              | Core Hub ( $k\geq30$ )      | social network                                           |
| 7    | job performance             | 48              | Core Hub ( $k\geq30$ )      | job performance                                          |
| 8    | role conflict               | 40              | Core Hub ( $k\geq30$ )      | role conflict                                            |
| 9    | organizational learning     | 39              | Core Hub ( $k\geq30$ )      | organizational learning                                  |
| 10   | organizational commitment   | 38              | Core Hub ( $k\geq30$ )      | organizational commitment                                |
| 11   | role ambiguity              | 37              | Core Hub ( $k\geq30$ )      | role ambiguity                                           |
| 12   | task performance            | 35              | Core Hub ( $k\geq30$ )      | task performance                                         |
| 13   | freedom                     | 32              | Core Hub ( $k\geq30$ )      | freedom                                                  |
| 14   | customer satisfaction       | 30              | Core Hub ( $k\geq30$ )      | customer satisfaction                                    |
| 15   | burnout                     | 27              | Middle-Tier ( $k=5\sim29$ ) | burnout                                                  |
| 16   | external representation     | 27              | Middle-Tier ( $k=5\sim29$ ) | external representation                                  |
| 17   | absorptive capacity         | 26              | Middle-Tier ( $k=5\sim29$ ) | absorptive capacity                                      |
| 18   | self-efficacy               | 26              | Middle-Tier ( $k=5\sim29$ ) | self-efficacy                                            |
| 19   | knowledge acquisition       | 25              | Middle-Tier ( $k=5\sim29$ ) | knowledge acquisition                                    |
| 20   | empowerment                 | 24              | Middle-Tier ( $k=5\sim29$ ) | empowerment                                              |
| 21   | pos                         | 24              | Middle-Tier ( $k=5\sim29$ ) | POS, pos                                                 |
| 22   | role overload               | 23              | Middle-Tier ( $k=5\sim29$ ) | role overload                                            |
| 23   | strain                      | 22              | Middle-Tier ( $k=5\sim29$ ) | strain                                                   |
| 24   | transformational leadership | 20              | Middle-Tier ( $k=5\sim29$ ) | Transformational Leadership, transformational leadership |
| 25   | dedication                  | 19              | Middle-Tier ( $k=5\sim29$ ) | dedication                                               |
